

## Maths

In Maths, we are going to begin the term by thinking all about number. We will start by thinking about the value of number and representing different numbers using a range of resources. We will then use our knowledge to create numbers using different classroom resources and thinking about the different compositions of a number. The children will be introduced to part, part whole models and represent the numbers in a variety of ways. We also have a focus on number bonds and learning the vocabulary needed when comparing numbers.

## PE

In PE, we will begin by mastering our key skills. We will start by learning the technique to accurately throw and catch different pieces of equipment over different distances. We will then learn how to control our bodies when we are moving in different directions and at different speeds. We will also ensure that we are able to balance without wobbling.

## Science

In Science, we will be learning all about materials and making close observations. We will begin by grouping materials in different ways and seeing how they are similar and different. We will look at rock, metal, fabric, wood, plastic and ceramic materials. Next, we will sort the materials according to their properties: bendy/not bendy, hard/soft. We will look at where we can find the materials in school and the different items that are made from them. We will carry out problem solving and look at why certain materials are really good for a certain job and why some materials are not.

## Geography

In Geography, we will be carrying out some important fieldwork for our special visitors of the 'Mr Men and Little Miss characters.' First, we will teach them all about the different features that we can find in Tweseldown and learn which are human and which are physical features. We will draw maps to show the Mr Men and Little Miss where they will find these features in our school. We will compare these features to another school in the UK and see if all schools are the same. We will then think about what makes our schools special and find different places that the Mr Men and Little Miss Characters would enjoy in school.

## My Super School

## PHSE and RHE

In RHE, we are going to be learning all about the Colour Monsters. We will look at the story 'Colour Monster goes to School' and think about how the monster feels as he goes through the school day. We will learn about how our faces look when we feel those emotions and create images and models of these emotions.

## RE

In RE, we are going to think about different special places. We will begin by thinking about places that are special to ourselves, before thinking about other people's special places. We will visit a local church to experience a special place.

## English

In English, we will start by producing a tour guide for our Mr Men and Little Miss characters to tell them all about different places in our school. We will take photographs and practise writing sentences with finger spaces and sitting all our letters on the line. Next, we will be creating fact files all about our life at school. We will again continue to practise our sentence writing skills and remember to use full stops and capital letters. Finally, we will read the stories about our Mr Men and Little Miss visitors and create our own versions of the stories. We will continue to focus on writing precise sentences, forming letters correctly and spelling common exception words accurately.

## Art

In Art, we will be focussing on sketching. We will learn about the artist Stephen Wiltshire and be inspired by his sketches. We will learn how to create different effects with our pencil and sketch different parts of the school. For our final piece, we will sketch a favourite part of school and add a pop of colour focussing on careful colouring skills.

## Computing

In Computing, we are going to be learning the basic skills we need to use a laptop or computer. We will begin by learning how to turn on and log on to the laptops. After that, we will learn how to open a word document and use the keyboard to type. We will also learn how to change the colour and size of the font.
